DETAILED ACTION

- This action is responsive to the following communication: an amendment filed on 8/17/2009 and authorized examiner's amendment dated 12/7/2009.
- Claims 1, 4-6, 8-10, 12-14, 19-20 are now allowed; claims 2-3, 7, 11, and 15-18 have been canceled, wherein claims 2, 11, and 15-18 have been canceled via examiner's amendment.
- During telephone interview with Libby Varghese dated 12/7/2009, Ms. Varghese agreed to file a terminal disclaimer to obviate a double patenting issues with respect to U.S. Patent No. 7634156. The Terminal Disclaimer has been received and approved.

EXAMINER'S AMENDMENT

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Libby Varghese on 12/7/2009.

Please amend the following claims:

1. (Currently Amended) A method for providing actual scale information of a digital raster image, comprising:

digitizing a paper document using a digitizing device to create a digital raster image;

recording scale information associated with the paper document and ~~the~~ scale information of digitizing device, wherein the scale information includes an original scale of the paper document, a dots per inch (DPI) of the digitizing device, and an original size of the paper drawing;

embedding the scale information in a ~~dedicated~~ tag location of a header of the digital raster image;

Art Unit: 2625

storing the digital raster image as a single file, wherein said embedded scale information is embedded in said ~~dedicated~~ tag location of said header of said single file; and

providing a digital image viewer for,

rendering the digital raster image,

receiving drawing input from a user comprising a line or a shape,

calculating a true scale measurement of the drawn line or shape based at least in part on the embedded scale information in said ~~dedicated~~ tag location of said header of said single file, and

presenting the true scale measurement to the user via the viewer.

2. (Canceled)

5. (Currently Amended) The method of claim 4, wherein embedding the scale information in a tag location of a header of the digital raster image comprises embedding the scale information in a tag location of a header of the TIFF image.

6. (Currently Amended) A computer-based method for providing true scale information of a digital raster image made from a paper document by a digitizing device, comprising:

receiving a digital raster image, wherein the digital raster image has scale information of the paper document and the scale information of the digitizing device embedded in a ~~dedicated~~ tag location of a header of the digital raster image, wherein the scale information includes an original scale of the paper document, a dots per inch (DPI) of the digitizing device, and an original size of the paper drawing;

rendering the digital raster image;

receiving drawing input from a user comprising a line or shape;

calculating a true scale measurement of the drawn line or shape based at least in part on the scale information embedded in said ~~dedicated~~ tag location of said header of the digital raster image; and

presenting the true scale measurement to the user.

7. (Canceled)

Art Unit: 2625

9. (Currently Amended) The method of claim 8, wherein the scale information is embedded in a tag location header of the TIFF image.

10. (Currently Amended) A system for presenting actual scale information of a digital raster image, comprising:

a digitizing device that digitizes a paper document to create a digital raster image,

wherein scale information associated with the paper document and the scale information of the digitizing device is recorded and embedded in a ~~dedicated~~ tag location of a header of the digital raster image, wherein the scale information includes an original scale of the paper document, a dots per inch (DPI) of the digitizing device, and an original size of the paper drawing; and

a digital image viewer that receives the digital raster image and:

renders the digital raster image,

receives drawing input from a user comprising a line or shape,

calculates a true scale measurement of the drawn line or shape based at least in part on the scale information embedded in said ~~dedicated~~ tag location of said header of the digital raster image; and

presents the true scale measurement to the user.

11. (Canceled)

14. (Currently Amended) The system of claim 13, wherein the scale information is embedded in a tag location of a header of the TIFF image.

15-18 (Canceled).

Allowable Subject Matter

- Claims 1, 4-6, 8-10, 12-14, 19-20 are allowed; renumbered as claims 1-12.

Art Unit: 2625

The following is an examiner's statement of reasons for allowance: The cited prior arts of record (US 6134338 to Solberg et al; US 20020077787 to Rappaport et al) fail to teach and/or suggest a method of embedding scale information of paper document and scale information of a digitizing device in a tag location of a header of a digital raster image file, wherein the scale information includes an original scale of the paper document, a dots per inch (DPI) of the digitizing device, and an original size of the paper drawing as cited in claims 1, 6, and 10.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
